Do you want to be an actor or an actress? Maybe you think it's very difficult. But at our school, everyone can be one. I play a part in our school's microfilm (微电影).

Last month, our teachers asked us to make a microfilm about school life. We chose two classmates to write the story. After two weeks, they finished the story.

The story is about a student Tina who loses the only computer in class. Some complain about her. She feels sorry and sad. Susan and Tony help her. Finally they find it and become friends.

We practiced acting every day. Sometimes I was too tired to make the movie. But my classmates encouraged me. "You're a really good actor," they said. These warm words made me happy. Thank you, my dear classmates! Because of you, I can keep going.

Going to a friend's house is very exciting. But remember to be polite.

When to arrive

First, get there on time. If your friend tells you to come "around 3:00", that means you can arrive a few minutes after 3:00. But it is also good to arrive at the right time.

What to bring

Often it is also nice to bring something to your friend's house. A book or a box of chocolate.

You can also bring some flowers. A little gift is a nice way to show your friend that you are excited to be at his or her house.

How to greet

You may also meet your friend's parents. You should tell them your name. Call your friend's mum aunt and call your friend's dad uncle. This will show them respect.

It is a cool thing to visit a friend's house. Be polite to your friend's parents, and you will be invited again!

C

It seems to be strange to you there is a blind spot on the eyes. Here is an interesting experiment that can make something disappear, when one eye is open.

Make a card about the size of a postcard and write two English letters L and R on it, L on the left and R on the right. First, hold the card about 80 cm away and you see both the letters. Then close your right eye and look at the letter R only with your left eye. And now, as you move the card slowly towards you, you'll find the letter L disappearing. But if you move the card nearer to your face, the letter will be seen again. Now do the same experiment with your left eye closed, you'll find the letter R disappearing.

Why does the letter disappear? It is because there is a blind spot on the eyes. When the image of the letter falls on the blind spot, it won't be seen. That is why either of the letters disappears.
